

Krytox™ FPG 028

Performance Lubricants

MIL-PRF-27617 G Type IV Grease
Approval No. AFPET/PTPT 12-003

Product Information

Krytox™ FPG 028 is a smooth, buttery white grease. It has been specifically developed to operate over a wide temperature service range, -73 to 204 °C (-99 to 399 °F), to be resistant to hydrocarbon fuel and liquid oxygen, and to be used as a lubricant in aircraft, aerospace vehicles, and supporting equipment. It is a perfluoropolyether

(PFPE)-based grease thickened with a special high performance PTFE thickener, and has exceptional chemical and oxygen resistance. It is designed to operate under severe conditions, and can be used for bearings, gears, and as a lubricant for O-rings and elastomers.

Storage and Handling

Does not oxidize or degrade from atmospheric contact. Life of uncontaminated product in reclosed container is undiminished. Indefinite shelf life in unopened container.

It is normal for oil to separate from grease during storage. Before use, knead tubes or stir larger containers to remix.

Product Package

Krytox™ FPG 028 is available in 50 and 100 g syringes, 8 oz tubes, and 1.76 lb cartridges.
