

# **Technical Data Sheet**

Re-issued August 2005

## **EPIKURE™ Curing Agent 3015**

# **Product Description**

EPIKURE™ Curing Agent 3015 is a low viscosity amidoamine, low imidazoline content, fastsetting epoxy curing agent based on tall oil fatty acid and polyamines

# **Application Areas/Suggested Uses**

- · Concrete repairs
- River rock mortars
- Tooling compounds
- Metal and plastic adhesives
- Electrical potting
- Castings

#### **Benefits**

- Good adhesion
- · Good chemical resistance
- Low exotherm
- Low viscosity
- · High filler loading

### **Sales Specification**

Property	Units	Value	Test Method/Standard
Amine value	g/eq	420 - 450	ASTM D2896
Viscosity at 25°C	cР	500 - 900	ASTM D2196
Color	Gardner	=8	ASTM D1544

## **Typical Properties**

71 1			
Property	Units	Value	Test Method/Standard
Equivalent weight, approx.		95	
Pounds/gallon @ 25 °C	lbs/gal	8.0	ASTM D1475

Appearance		Slightly hazy	
Mix ratio, EPON™ Resin 828	pbw	30 - 60	

# **Performance Properties**

## Safety, Storage & Handling

Please refer to the MSDS for the most current Safety and Handling information.

Please refer to the Hexion web site for Shelf Life and recommended Storage information.

This curing agent product may crystallize after extended storage times. It can be reconstituted by gentle warming of the entire container and its contents to approximately 80°C (176°F) until all visual evidence of crystallization has gone away. Upon cooling to normal ambient temperature conditions the product will regain its original liquid state physical properties.

EPIKURE Curing Agent 3015 should be kept in tightly closed containers in a cool, dry place. Product will absorb moisture and carbon dioxide which may affect viscosity or create foaming when reacted with epoxy resins. EPIKURE Curing Agent 3015 has a tendency to crystallize. Should crystallization occur, it may be converted to liquid by opening the drum bung and gently warming to approximately 80 °C (176 °F).

Exposure to these materials should be minimized and avoided, if feasible, through the observance of proper precautions, use of appropriate engineering controls and proper personal protective clothing and equipment, and adherence to proper handling procedures. None of these materials should be used, stored, or transported until the handling precautions and recommendations as stated in the Material Safety Data Sheet (MSDS) for these and all other products being used are understood by all persons who will work with them. Questions and requests for information on Hexion, Inc. ("Hexion") products should be directed to your Hexion sales representative, or the nearest Hexion sales office. Information and MSDSs on non-Hexion products should be obtained from the respective manufacturer.

#### **Packaging**

Available in bulk and drum quantities.
