

milPure™

Specialty Solvents

Introduction

MilPure™ specialty solvents are used to clean medical oxygen service parts, a critical cleaning application. Particles or residue left behind may hinder the operation of life saving valves, sensors and controls. Miller-Stephenson has been providing the medical industry with the highest quality solvents used on today's advanced healthcare equipment.

Key Benefits & Characteristics

- Nonflammable
- LOX Impact (NF EN 1997; NHB 8060.1)
- Easier to use than Aqueous Cleaners
- Meets Boeing Spec. BAC 5402-02
- Easily Recycled and Reclaimed

Applications & Technical Data

Common Uses

- Surgical Devices
- Oxygen Equipment
- Precision Assemblies
- Bearings
- Machine Parts
- Carrier Solvent
- Medical Equipment

Access needles and other specialty devices are coated with a lubricant that enables easy entry into the body, reducing pain. MilPure™ is used to deposit these lubricants evenly to ensure complete coverage. High quality and consistent performance is what makes MilPure™ ideal for this application.
